

FR 2510 Anchoring Document

Background:

The Federal Reserve uses the FR 2510 to conduct a more complete balance sheet analysis of U.S. G-SIBs. Additionally, the FR 2510 provides the Federal Reserve with valuable systemic information through the collection of more granular data regarding common or correlated exposures and funding dependencies than is currently collected by existing reports by providing more information about U.S. G-SIBs' consolidated exposures and funding positions to different countries according to instrument, counterparty sector, currency, and remaining maturity. Relative to the FFIEC 009 and FR Y-9C, the FR 2510 provides significantly more detail regarding the balance sheet and derivatives exposures of U.S. G-SIBs.

Purpose:

This document is designed to assist G-SIBs when completing their FR 2510 report by comparing certain items with similarly-defined items on other quarterly financial statements. The interseries comparisons are intended to enhance data quality by reconciling reporting discrepancies and definitions. These tables provide a frame of reference for understanding the reported items on the FR 2510 and are not a one to one mapping to other reports.

The scope of this document has been limited to FR 2510 line items with exact or well-defined partial definitional coverage by items on comparison reports. FR 2510 Items that were excluded in the tables below may be reportable on other collections, however the FR 2510 requires different reporting configurations.

The information in this document is reflected for the September 2019 as-of date for the FR 2510, FR Y-9C, FFIEC 009, and other collections.

Classification Key

(A) - Anchored to an existing report: this item is identical to an item currently collected on another report (1-1 match).

(B) - The definition of this item is identical to an item currently collected on another report, but currency, maturity, and counterparty sector and country are not available.

(C) - Partial definition coverage: a portion (potentially significant) of this item is currently collected on one or more existing reports.
