Introduction

The Shoko Chukin Bank, Ltd (“the Covered Company”) has developed a Tailored Resolution Plan (“TRP”) to address the requirements for a resolution under the joint Board of Governors of the Federal Reserve System (“FRB”) and Federal Deposit Insurance Corporation (“FDIC”) rule implementing Section 165(d) of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“the SIFI Rule”).

The primary goal of the TRP is to ensure a rapid and orderly resolution in a manner that would not pose any serious adverse effects on U.S. financial stability while maximizing the value of the Core Business Lines (“CBLs”), providing the continuity of the Critical Operations (“COs”), and facilitating the orderly wind-down of the relevant Material Entities (“MEs”).

**(1) The names of material entities**

For TRP purposes, the Covered Company has identified The Shoko Chukin Bank, Ltd., New York Branch (“The New York Branch”) as the only ME.

The New York Branch was established in 1986 in New York and its primary business is to provide lending services to small and medium-sized enterprises (“SMEs”) corporate clients. The New York Branch facilitates foreign business activities for the Covered Company’s Japan-based clients in the U.S., Canada and Mexico. As of March 31, 2013, the New York Branch had \$461 million in total assets.

The Covered Company has identified the New York Branch as the sole ME in the U.S. because it provides access to the U.S. financial markets.

**(2) A description of core business lines**

Pursuant to the analysis below, the Covered Company has determined that it does not have any operations or activities in the United States that would be a CBL as defined in the SIFI Rule.

While the Covered Company identified its loan business as global key business, the New York Branch’s loan business represented less than 1% of the revenue of that global key business line for the year ended March 31, 2013, and asset size as of March 31, 2013.

Therefore, the Covered Company has not designated any CBLs.

#### (4) A description of derivative activities and hedging activities

The Covered Company engages in derivative transactions such as interest rate swap and currency swap as part of its asset-liability management. By utilizing the derivatives, the Covered Company hedges interest rate and foreign exchange fluctuation risk for securities, bonds, borrowings and

foreign currency loans. Hedge accounting is adopted for the derivative transactions that satisfy the requirements. The effectiveness of the hedge is evaluated by comparing the balances of hedged items and hedge instruments for the period from the start until the time to determine its effectiveness.

Also, the Covered Company executes trading purpose transactions by using interest rate swap, currency swap, bond futures, foreign exchange forward contract, etc., in order to support clients' needs to hedge the market fluctuation or for purpose of gaining returns from the variation of interest rates or foreign exchange rates.
