Your comment: Please see the attached video. I know...you like to speculate before you post them. It is amazing what sort of metrics you gave me to work with all of this time, but you refused to take seriously the concerns about the manners in which identity theft might impair your operations. Why is that? You still have all of those "crypto" links on the public comment from last autumn. I watched as you strategically permitted for the publication of a certain number of public comments JUST in time for SCOTUS to make a major announcement that served to aid and abet a central counter party strategy that had been worked for two election cycles and was set up by an organization alleging that it provides audits and accounting services. I mean...did I not perform well enough for you? How about now? 10:04 pm CST March 10, 2021
