

# 2004 SCF Chartbook

This file contains time series charts using triennial SCF data covering the period 1989 to 2004. The variables included are ones that appeared in the tables in “Recent Changes in U.S. Family Finances: Evidence from the 2001 and 2004 Survey of Consumer Finances” by Brian K. Bucks, Arthur B. Kennickell, and Kevin B. Moore, *Federal Reserve Bulletin*, **vol. 92 (February 2006), pp. A1-A38**; variable definitions are given in that article. These variables are analyzed separately for all families and by a variety of characteristics, such as age and income groups. For each variable and classification group, the charts show the percent of families in the group who have the item and the median and mean amounts of holdings for those who have any. Users should be aware that unlike the tables published in the *Bulletin* article, the estimates in the charts include those made for cells with fewer than five observations, a sample size deemed insufficient for robust estimates (see tables to identify which variables and groups are affected). All dollar estimates are given in 2004 dollars.
