My experience with the Bank of America in regards to overdraft fees is an extremely negative one. As a young adult and student i am still becoming familiar with my finances. I have a Student checking account, and debit card. I wrote a check for my doctor for 35 dollars which cleared a week later, the check seemed to be maneuvered to clear prior to any other purchases that day, rendering any purchase for the smallest amount a an iverdraft and incurring 35 dollars each, after 5 purchases of less than 5 dollars each and no notice of a check which had cleared midday. i understand that i made a mistake by not having the appropriate balance at the moment in time, but i feel as though the bank to the oppurtunity to take advantage of me by coldly punishing me to the charge of 175 dollars.
