There needs to be regulation on how much banks can charge for overdraft fees. My daughter is a freshmen in college & is still learning how to balance her ck book through online banking. Needless to say she is in, a transition period & the overdraft fees she has pd. to date is proof. I don't understand why the fees are so high. A person can never get out of the hole, especially if this is the 1st time they are exposed to balancing a ck. book. I have tried to educate my daughter on the perils of overdraft. She is finally realizing the overdraft fees she has pd. could have been in her pocket. The banks continue to over penalize the people & do not have accountability for their own actions. When is enough, enough. Greed has destroyed the American dream.
