Subject: Electronic Fund Transfers

Comments:

No I do not wish to have banking fees raised in these extremely difficult economic times the last thing the federal reserve should be doing is raising any fees pertaining to the American public could there dare I say even be a hiatus from fees for a month for the American Public please do not make things worse than they already are. If it is not something that will help please refrain from hurting us anymore than we have already been hurt!.

Thank you

Kathleen Watson
