Comments:

Sneaky and unscrupulous overdraft fees are yet another way that the banks are taking advantage of all of us and abusing the financial system. One overdraft fee can be more than the average small savings account earns in interest for one year! The banking system needs to be forced to stop this practice and to set the example for doing an honest business and having integrity in their business. Please allow me the chance to opt-in to overdraft services. This is the only way that I will truly feel protected.
