Comments:

I find it disgusting that so much is relied on our credit report, but getting regular access to this report and correcting continuous inaccurate reports is appalling. I have to pay to look at my report, i find something wrong I answer questions for identity purposes, and the report is so wrong because of theft, that me the actual person is denied seeing my report or fixing it. Then on agency reports one thign and the others something completely different. There is no integrity in this institution and i thin it should be abolished.
