Comments:

I believe that the way banks take advantage of people these days is criminal. For an institution to charge up to forty dollars to cover a two dollar charge that could have been declined is ridiculous. I've paid multiple overdraft fees because a paycheck was pending, in the bank's possession, but since their computers registered one before the other I pay. We need to put a stop to this racket. All of these banks charge and charge, take our bailout, give each other bonuses. Who is watching them? Who is watching out for the average American. Put a stop to it now!
