Overdraft charges. What do we the people opinionize?

No, plain and simple. Understood that banks make their highest profit sucking the life out of the lower classed, its as simple as having a system that doesnt let you charge an account when there is no money. Have you heard of that? Not all of us have blackberries and gadgets at every diposal to alert us of impending financial doom.

I dont even have a bank account and you want to guess as to why? Overdraft fees. And i'll never have a bank account again until all commerical-capital-economic-practices are REFORMED so that I dont have a bloody wallet after your shark bites are done with it. And give us our money back! Or better yet your imaginary money that you are so well at expending.

Thanks.
