Comments:

The amount banks charge for overdraft fees is excessive. I could understand a five dollar overdraft fee but 35 dollars is too much. When you have several small payments that are charged at \$35.00 each it becomes a burden that can mean the difference between grocery shopping or paying the bank. It can not possible cost the bank this much for an overdraft. If this regulation can help make these O.D. fees reasonable it would be a great help.
