Washington, D.C. 20551

Re : 12 CFR ,Part 241, Sect.618, et. seq.

Supervised Securities Holding Co.s Registration

Foreign Bank Holding Company, SEC Brokerage

Licensee, US national bank BHC foreign parent org.

Dear Hon. BOG Officers, Madam and Sirs,

In good faith, in the public interest, in plain language, we wish to respectfully submit our public comments, regarding proposed regulations, of BHC and SEC licensed securities brokers, or dealers, subsidiaries of parent org.s, pursuant to Dodd-Franks Act, to make accountable mega-BHC org.s, and foreign bank org.s, which operate outside federal supervision, although, the own US National banks, such as; Chinese ICBC/CIC/ Hanjin BHC org., and, Bank of East Asia, USA, a U.S. national bank, with US- $\$$ EC. Registered Securities brokerage dealer licensing, attempting to merge before passage of Dodd-Frank Act.

We submit, foreign BHC parent org.s, such as, ICBC, and CIC, must register, under Dodd-Franks Act, and, submit to supervision by the USA Federal Reserve System and BOG, if they wish to operate within the continental USA banking system.

The intent of Dodd-Franks regulation is to de-monopolize megabanks" too- big -to- fail", not to; act contrary to the public trust, by merging small banks into ever larger, ever irresponsible, and, corrupt private investment bankers of the plutocracy, as vehicles to manipulate the short selling of USA financial system to the Communist Chinese Party conspirators. USA National economic treason, by selling out our American vital national economic security is a matter of the present danger.

This vital fundamental reform must not fail, must not be perverted by plutocratic special-interests corruption, to defeat the core principles of transformation of the American financial system into a vehicle for oligarchic malfeasance.

There exists a core conflict within FOMC Board on the fundamental reform direction of the Federal Reserve System, and, the treason of selling out our vital American National Security Financial Interests to the Chinese Communist Party tyranny, by borrowing irresponsible debt, at the great peril of the long-term interests of the USA American peoples prosperity, treasonable irresponsibility, by the Federal Reserve Board.

If a great depression is caused by your malfeasance, whom, do you believe the American people will hold responsible ? It is you, no one else, you.

Yes, now you begin to comprehend your own peril, it may dawn on you, that it is you, that they will blame ! You are the bankers for the plutocracy, they will blame you ! You borrowed the loans, the national debt, from the Chinese Communist Party, how responsible ? You loaned the low interest funds to the multinational corporations that offshored the jobs, the industry, the national economic system outsourced overseas to China.

A race to the bottom for the cheapest labor rates in China, to compete with slave-laborers in China, that's very democratic of you, to subsidize the offshoring of American jobs and industry to Communist China, then borrow China/s profits on slave labor.

Patriotism is when you become responsible for fellow Americans

welfare? It is time to develop a sense of fairplay to your own people, Americans. You can't expect politicians to be anything but corrupt liars, they are the devils children, no damn good.

It is time to think of your own nation first, not the plutocracy, but democracy.

WE, the People, cannot be co-conspirators with the corrupt tyranny of Communist Party of China, it is not a sound policy, they will end in regime-change soon, and, the new democracy will NOT be pleased that America was the business partner of the Communist Party tyranny; do you get-it yet,?, even the President's new policy on Libya, supports democracy, after the Egyptian revolution, it was time to switch sides, and support freedom for the people.

It is now time to address vital new national economic and financial security interests by supporting the new Chinese peoples democracy and freedom, versus conspiracy with the Beast. The majority of the national debt 30% is owed to Communist Party of China, which will break-up like the Soviet Union, into four ethnic minority States of democratic republics, your national debt will be defaulted, to the fallen Communist Party State, debt desolved by regime-change by revolution.

This is the future destiny; the sooner you embrace this fate, the sooner the American people will be free of your irresponsibility of accepting this debt in the name of all American People, not an honorable obligation ?

What is your solution ? 20% inflation rate for five years of poverty and great depression ?

Well, if you let Dodd-Franks get controlled by the monopolists, it will be a great failure of epic default, and great depression, and, yes, rebellion, and, revolution, civil war, anarchy, chaos.

We are at a tipping-point; some say two or three years max. ?

Your private investment bankers have really made a great mess of greed, corruption, and, folly.

Honorable BOG, please accept the assurance of our highest regard, we shall have the honor to remain;

Respectfully,

John J. Wheeling
