Postal (if outside the U.S.):

Your comment: Thanks for the plartform. This is not as hard as it looks, but however the lies, secrets and love of money got people to be so greedy to a point that none of them could even notice when they were driving the whole world down. so let us go back to where it all started.... OMB 1546-0043 The shares rather ownership of 50% was not received by anyone that was intended for but however, the identity of the 3rd Generation was used in order to gain power then further more took their personal investments then turned themselves intointo nominiees, then trustees while in the whole time they made everyone to believe that the owner of the identity being used is noit mentally well, then further more no truth was told about bloodline, infact . here in South Africa the people that raised us took over and never gave us any human rights, so in short they even ran the federal still using our identity hence they still refuse to give out Paia Act. It do not end here, then under telecommunication, our mobile phones get to be under the control of the operators. and then reseling us what already belong to us. In short the shareholders end up not able to identify themselves due to the fact that they impersonating youth. I for one have been on digging the truth and the truth is 97% of the youth know nothing about who is federal, or who even is running faderal government. 99.99% of the Companies are ran with other peoples identity, which in results is the reason why there is much unemployment., worse now under central banks they money in keept in South African banks and not circulating. another worse part of it all they do not even want to be exposed.
