

Prefatory Note

The attached document represents the most complete and accurate version available based on original copies culled from the files of the FOMC Secretariat at the Board of Governors of the Federal Reserve System. This electronic document was created through a comprehensive digitization process which included identifying the best-preserved paper copies, scanning those copies,¹ and then making the scanned versions text-searchable.² Though a stringent quality assurance process was employed, some imperfections may remain.

Please note that this document may contain occasional gaps in the text. These gaps are the result of a redaction process that removed information obtained on a confidential basis. All redacted passages are exempt from disclosure under applicable provisions of the Freedom of Information Act.

¹ In some cases, original copies needed to be photocopied before being scanned into electronic format. All scanned images were deskewed (to remove the effects of printer- and scanner-introduced tilting) and lightly cleaned (to remove dark spots caused by staple holes, hole punches, and other blemishes caused after initial printing).

² A two-step process was used. An advanced optimal character recognition computer program (OCR) first created electronic text from the document image. Where the OCR results were inconclusive, staff checked and corrected the text as necessary. Please note that the numbers and text in charts and tables were not reliably recognized by the OCR process and were not checked or corrected by staff.

SUPPLEMENTAL NOTES

Retail sales

Retail sales in nominal terms rose only 0.6 percent in October, according to the advance report, indicating a continuation of the lack-luster consumer spending pattern. In addition, sales in September were revised down four-tenths percentage point to show a 0.6 percent rise. Autos were the chief source of strength the last two months. Sales in the automotive group were up 3.9 percent in October, following a 4.3 percent increase in September. Excluding this group, retail sales fell 0.1 percent in each month.

Manufacturing and trade inventories

The book value of retail inventories rose at a \$23 billion annual rate in September. As in the previous three months, much of the September inventory rise was in the automotive sector. Between May and September retailers accumulated stocks at a rapid \$20 billion annual rate, after liquidating inventories at an \$8 billion rate during the first five months of the year. The stock buildup in recent months has been accompanied by sluggish sales performance, and consequently the inventory-sales ratio has been moving up; at 1.45 in September, the ratio about equaled the cyclical peak reached at the beginning of 1982. The book value of total manufacturing and trade inventories increased at an \$8.6 billion rate in September--about in line with the moderate rate of accumulation during the two preceding months--as increases in trade stocks offset liquidation at manufacturers. The inventory-sales ratio remained at 1.52.

1. Quarterly growth rates are computed on a quarterly average basis. Dollar amounts shown under memoranda for quarterly changes are calculated on an end-month-of-quarter basis.

2. M1 seasonally adjusted using alternative model-based procedure applied to weekly data.

3. Overnight and continuing contract RPs issued to the nonbank public by commercial banks, net of amounts held by money market mutual funds, plus overnight Eurodollar deposits issued by Caribbean branches of U.S. member banks to U.S. nonbank customers. Excludes retail RPs, which are in the small time deposit components.

4. Net of large-denomination time deposits held by money market mutual funds and thrift institutions.

5. Adjusted for shifts of assets and liabilities to International Banking Facilities (IBFs) which affected flows from December 1981 to September 1982.

6. Consists of borrowings from other than commercial banks in the form of federal funds purchased, securities sold under agreements to repurchase and other liabilities for borrowed money (including borrowings from the Federal Reserve and unaffiliated foreign banks), loans sold to affiliates, loan RPs and other minor items. Data are partially estimated.

7. Consists of Treasury demand deposits at commercial banks and Treasury note balances.

U.S. International Financial Transactions

Revisions to the preliminary September data on U.S. International Transactions indicate that net private foreign purchases of long term dollar-denominated Treasury bonds and notes were about \$800 million in September. Moreover, net foreign private purchases of both short and long term dollar-denominated Treasury obligations and U.S. corporate securities were \$2.0 billion in September.

Part 2, page II-19:

In the last line of the table, change "7.3" and "6.5" in the two right-hand columns to read "8.1" and "6.9". A corrected version of the table follows on the next page.

International

Part 2, page IV-2, bottom panel:

The solid line represents the interest rate on U.S. CDs. The dashed line is a weighted-average of foreign interbank rates. The spike in the U.S. CD rate on October 21 is an error; the value should be 8.9 rather than 9.9.

SELECTED MEASURES OF LABOR COSTS
IN THE NONFARM BUSINESS SECTOR
(Percentage change at annual rates; quarterly
changes based on seasonally adjusted data)

	1980	1981	1981 Q4	1982 Q1	1982 Q2	1982 Q3	Year-to- date
<u>Hourly Earnings Index, wages - production workers¹</u>							Dec. 1981- Oct. 1982
Total private nonfarm	9.6	8.4	7.3	6.5	6.4	6.2	6.0
Manufacturing	10.9	8.8	7.7	8.7	6.6	6.3	6.4
