Transactions undertaken with such accounts under the provisions of this paragraph may provide for a service fee when appropriate.

By unanimous vote the Authorization for Foreign Currency Operations shown below was reaffirmed:

AUTHORIZATION FOR FOREIGN CURRENCY OPERATIONS  
Reaffirmed March 29, 1988

1. The Federal Open Market Committee authorizes and directs the Federal Reserve Bank of New York, for System Open Market Account, to the extent necessary to carry out the Committee's foreign currency directive and express authorizations by the Committee pursuant thereto, and in conformity with such procedural instructions as the Committee may issue from time to time:

Belgian francs  
Canadian dollars  
Danish kroner  
Pounds sterling

B. To hold balances of, and to have outstanding forward contracts to receive or to deliver, the foreign currencies listed in paragraph A above.

C. To draw foreign currencies and to permit foreign banks to draw dollars under the reciprocal currency arrangements listed in paragraph 2 below, provided that drawings by either party to any such arrangement shall be fully liquidated within 12 months after any amount outstanding at that time was first drawn, unless the Committee, because of exceptional circumstances, specifically authorizes a delay.

D. To maintain an overall open position in all foreign currencies not exceeding \$12.0 billion. For this purpose, the overall open position in all foreign currencies is defined as the sum (disregarding signs) of net positions in individual currencies. The net position in a single foreign currency is defined as holdings of balances in that currency, plus outstanding contracts for future receipt, minus outstanding contracts for future delivery of that currency, i.e., as the sum of these elements with due regard to sign.

2. The Federal Open Market Committee directs the Federal Reserve Bank of New York to maintain reciprocal currency arrangements ("swap" arrangements) for the System Open Market Account for periods up to a maximum of 12 months with the following foreign banks, which are among those designated by the Board of Governors of the Federal Reserve System under Section 214.5 of Regulation N, Relations with Foreign Banks and Bankers, and with the approval of the Committee to renew such arrangements on maturity:

3. All transactions in foreign currencies undertaken under paragraph 1(A) above shall, unless otherwise expressly authorized by the Committee, be at prevailing market rates. 4. It shall be the normal practice to arrange with foreign central banks for the coordination of foreign currency transactions. In making operating arrangements with foreign central banks on System holdings of foreign currencies, the Federal Reserve Bank of New York shall not commit itself to maintain any specific balance, unless authorized by the Federal Open Market Committee. 5. Foreign currency holdings shall be invested insofar as practicable, considering needs for minimum working balances. Such investments shall be in liquid form, and generally have no more than 12 months remaining to maturity. Government securities may be purchased from foreign central banks under agreements for repurchase of such securities within 30 calendar days.

6. All operations undertaken pursuant to the preceding paragraphs shall be reported promptly to the Foreign Currency Subcommittee and the Committee. At the request of any member of the Subcommittee, questions arising from such reviews and consultations shall be referred for determination to the Federal Open Market Committee.

7. The Chairman is authorized:

A. With the approval of the Committee, to enter into any needed agreement or understanding with the Secretary of the Treasury about the division of responsibility for foreign currency operations between the System and the Treasury;

B. To keep the Secretary of the Treasury fully advised concerning System foreign currency operations, and to consult with the Secretary on policy matters relating to foreign currency operations;

C. From time to time, to transmit appropriate reports and information to the National Advisory Council on International Monetary and Financial Policies.

B. Any operation that would result in a change on any day in the System's net position in a single foreign currency exceeding \$150 million, or \$300 million when the operation is associated with repayment of swap drawings.

C. Any operation that might generate a substantial volume of trading in a particular currency by the System, even though the change in the System's net position in that currency might be less than the limits specified in 1B.

D. Any swap drawing proposed by a foreign bank not exceeding the larger of (i) \$200 million or (ii) 15 percent of the size of the swap arrangement.

2. The Manager for Foreign Operations shall clear with the Committee (or with the Subcommittee, if the Subcommittee believes that consultation with the full Committee is not feasible in the time available, or with the Chairman, if the Chairman believes that consultation with the Subcommittee is not feasible in the time available):

With Ms. Seger dissenting, the Federal Reserve Bank of New York was authorized and directed, until otherwise directed by the Committee, to execute transactions in the System Account in accordance with the following policy directive:

The information reviewed at this meeting suggests some moderation in the expansion of economic activity in the current quarter from the rapid pace in the fourth quarter; the continuing expansion has been supported by a sharp pickup in domestic final sales while the accumulation of inventories appears to have slowed. Total nonfarm payroll employment rose substantially over the first two months of the year, although employment growth slowed somewhat in the manufacturing sector. The civilian unemployment rate fell slightly to 5.7 percent in February. Growth in industrial production moderated in early 1988 from a brisk pace during the second half of 1987. Consumer spending strengthened in January and February, buoyed by higher sales of motor vehicles. Indicators of business capital spending pointed to substantial gains in the first quarter. Housing starts rebounded in February but were still somewhat below the reduced fourth-quarter average. The nominal U.S. merchandise trade deficit changed little in January and was significantly below the fourth-quarter average. In recent months the rise in consumer and producer prices has been relatively modest on balance, reflecting developments in food and energy prices, and wage trends have shown little change.

Most interest rates were up somewhat on balance since the Committee's meeting in February, with the largest increases concentrated in bond markets. The trade-weighted foreign exchange value of the dollar in terms of the other G-10 currencies fluctuated in a relatively narrow range over most of the intermeeting period, but declined somewhat in recent days.

After strengthening in January, growth of M2 and M3 remained relatively robust in February and in the first part of March. Thus far this year expansion of these two aggregates appears to have been in the upper portion of the ranges established by the Committee for 1988. M1 has grown moderately on balance since the fourth quarter. Expansion in total domestic nonfinancial debt appears to be continuing at a pace close to that in 1987.

3/29/88

- 14 -

The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability over time, promote growth in output on a sustainable basis, and contribute to an improved pattern of international transactions. In furtherance of these objectives, the Committee at its meeting in February established growth ranges of 4 to 8 percent for both M2 and M3, measured from the fourth quarter of 1987 to the fourth quarter of 1988. The monitoring range for growth in total domestic nonfinancial debt was set at 7 to 11 percent for the year.

With respect to M1, the Committee decided in February not to establish a specific target for 1988. The behavior of this aggregate in relation to economic activity and prices has become very sensitive to changes in interest rates, among other factors, as evidenced by sharp swings in its velocity in recent years. Consequently, the appropriateness of changes in M1 this year will continue to be evaluated in the light of the behavior of its velocity, developments in the economy and financial markets, and the nature of emerging price pressures.

In the implementation of policy for the immediate future, the Committee seeks to increase slightly the degree of pressure on reserve positions. The Committee agrees that the current more normal approach to open market operations remains appropriate; still sensitive conditions in financial markets and uncertainties in the economic outlook may continue to call for some flexibility in operations. Taking account of conditions in financial markets, somewhat greater reserve restraint or somewhat lesser reserve restraint would be acceptable depending on the strength of the business expansion, indications of inflationary pressures, developments in foreign exchange markets, as well as the behavior of the monetary aggregates. The contemplated reserve conditions are expected to be consistent with growth in M2 and M3 over the period from March through June at annual rates of about 6 to 7 percent. The Chairman may call for Committee consultation if it appears to the Manager for Domestic Operations that reserve conditions during the period before the next meeting are likely to be associated with a federal funds rate persistently outside a range of 4 to 8 percent.

It was agreed that the next meeting of the Committee would be held on Tuesday, May 17, 1988.

The meeting adjourned.
