# Report on the Condition of the U.S. Banking Industry: Second Quarter, 2004 

Assets of reporting bank holding companies rose $\$ 365$ billion ( 3.9 percent) in the second quarter, to $\$ 9.65$ trillion. Loans accounted for the majority of this overall growth (up $\$ 194$ billion, or 4.3 percent). Loan growth was primarily in consumer categories, while commercial lending activity remained weak. Reflecting this weakness in business loans, unused commitments to lend grew only $\$ 70$ billion, or onethird of the growth seen in each of the two previous quarters. The increase in total assets was significantly influenced by the addition of a new insuranceoriented financial holding company (John Hancock) with consolidated assets of $\$ 115$ billion, mostly in other assets.

Even with the addition of the new insuranceoriented financial holding company, securities and money market assets rose only $\$ 41$ billion, or 1.1 percent. The overall growth masked significant differences across the population of reporting bank holding companies. Holdings of these assets declined $\$ 16$ billion, or 0.6 percent, at the fifty large bank holding companies as these institutions sought to position their balance sheets for possible future interest rate increases. In contrast, such assets rose slightly at the generally smaller "all other reporting companies" and more significantly at the few large bank holding companies excluded from the "fifty large" panel, because commercial banking operations account for only a small portion of their assets and earnings.

Deposits grew strongly (up $\$ 165$ billion, or 3.4 percent), attributable in part to continued healthy increases in core deposits. Borrowings rose at a slower pace ( $\$ 55$ billion, or 1.9 percent). The remarkable growth in other assets and other liabilities10.7 percent and 12.0 percent, respectively-was influenced significantly by insurance-related items
associated with the addition of the new insuranceoriented financial holding company.

Strong asset growth was also reflected in slightly lower aggregate capital ratios during the quarter. Although these ratios remained well above minimum requirements, each of the three aggregate regulatory measures-the Tier 1 risk-based, total risk-based, and leverage capital ratios-fell about 20 basis points.

Net income fell $\$ 5$ billion ( 18.0 percent), to $\$ 25$ billion, related to widely publicized one-time litigation charges at two of the largest bank holding companies. Including these one-time charges, aggregate noninterest expenses rose $\$ 17$ billion ( 20.0 percent) despite a slight decline in total employment at reporting bank holding companies (down 13,000, or 0.6 percent) that in turn was attributable to a falloff in mortgage origination activity. Net interest income and non-interest income each rose $\$ 4$ billion, or about 6.0 percent. Net interest income was supported by an increase in interest-earning assets and a slight widening of the net interest margin (up 3 basis points, to 3.48 percent), while non-interest income benefited from stronger market-sensitive revenues. Realized securities gains fell 50.0 percent, or $\$ 1$ billion, as rising long-term interest rates negatively affected the market value of investment securities.

Asset quality continued to improve with nonperforming assets falling below 1.00 percent of loans and related assets for the first time in four years, reaching 0.97 percent. Net charge-offs declined to 0.64 percent of average loans, about on par with the loss rate experienced in 2000 . With these indications of improvement, the aggregate allowance for loan losses remained unchanged at $\$ 75$ billion despite the significant growth in loans noted earlier.

Note. All data are as of the most recent period shown. The historical figures may not match those in earlier versions of this table because of mergers, significant acquisitions or
divestitures, or revisions or restatements to bank holding company financial reports. Data for divestitures, or revisions or restatements to bank holding company financial reports. Data for the most recent period may not include all late-filing institutions.

1. Covers top-tier bank holding companies except (1) those with consolidated assets of less than $\$ 150$ million and with only one subsidiary bank and (2) multibank holding companies with consolidated assets of less than $\$ 150$ million, with no debt outstanding to the general public and not engaged in certain nonbanking activities.
2. Data for all reporting bank holding companies and the fifty large bank holding companies reflect merger adjustments to the fifty large bank holding companies. Merger adjustments account for mergers, acquisitions, other business combinations and large divestitures that occurred during the time period covered in the tables so that the historical information on each of the fifty underlying institutions depicts, to the greatest extent possible, the institutions as they exist in the most recent period. In general, adjustments for mergers among bank
holding companies reflect the combination of historical data from predecessor bank holdholding compan
ing companies.
The data for the fifty large bank holding companies have also been adjusted as necessary to match the historical figures in each company's most recently available financial sary to ma
statement.
In general, the data are not adjusted for changes in generally accepted accounting principles.
3. Inclu
4. Includes minority interests in consolidated subsidiaries.
5. Includes credit card lines of credit as well as commercial lines of credit. some interest wheth sold to securitization vehicles in which bank holding companies retain ing the underlying assets. Securitization data were first collected on the FR Y-9C report for June 2001.
6. The notional value of a derivative is the reference amount of an asset on which an interest rate or price differential is calculated. The total notional value of a bank holding company's derivatives holdings is the sum of the notional values of each derivative contract regardless of whether the bank holding company is a payor or recipient of payments under the contract. The actual cash flows and fair market values associated with these derivative contracts are generally only a small fraction of the contract's notional value.
7. Income statement subtotals for all reporting bank holding companies and the fifty large bank holding companies exclude extraordinary items, the cumulative effects of changes in accounting principles, and discontinued operations at the fifty large institutions and therefore will not sum to Net income. The efficiency ratio is calculated excluding nonrecurring income and expenses.
8. Calculated on a fully-taxable-equivalent basis.
9. In general, the fifty large bank holding companies are the fifty largest bank holding few large bank holding ew large bank holding companies whose commercial banking operations account for only a small portion of assets and earnings.
10. Excludes predecessor bank holding companies that were subsequently merged into other bank holding companies in the panel of fifty large bank holding companies. Also
excludes those bank holding companies excluded from the panel of fifty large bank holding companies because commercial banking operations represent only a small part of their consolidated operations.
11. Exclude qualifying institutions that are not reporting bank holding companies.
12. No data related to financial holding companies and only some data on nonbanking activities were collected on the FR Y-9C report before implementation of the Gramm-Leach-Bliley Act in 2000.
13. A bank holding company is considered "foreign-owned" if it is majority-owned by a foreign entity. Data for foreign-owned companies do not include data for branches and agencies of foreign banks operating in the United States
14. Total assets of insured commercial banks in the United States as reported in the commercial bank Call Report (FFIEC 031 or 041, Reports of Condition and Income). Excludes separate call reports yet are also covered by the reports filed by their parent baks. Also separate call reports yet are also coved by the repors fise by excludes data for mutual savings banks.
15. Data find thrift, foreign nonbank, and other nonbank institutions are total assets of type of subsidiary as reported in the FR Y-9LP report. Data cover those subsidiaries in which
the top-tier bank holding company directly or indirectly owns or controls more than 50 percent of the outstanding voting stock and that has been consolidated using generally accepted accounting principles. Data for securities broker-dealers are net assets (that is, total accepted accounting principles. Data for securities broker-dealers are net assets (that is, total
assets, excluding intercompany transactions) of broker-dealer subsidiaries engaged in activities pursuant to the Gramm-Leach-Bliley Act, as reported on schedule HC-M of the FR Y-9C report. Data for insurance activities are all insurance-related assets held by the bank holding company as reported on schedule HC-I of the FR Y-9C report.

Beginning in 2002:Q1, insurance totals exclude intercompany transactions and subsidiaries engaged in credit-related insurance or those engaged principally in insurance agency activities. Beginning in 2002:Q2, insurance totals include only newly authorized insurance activities under the Gramm-Leach-Bliley Act.
16. Aggregate assets of thrift subsidiaries were affected significantly by the conversion of Charter One's thrift subsidiary (with assets of $\$ 37$ billion) to a commercial bank in the second quarter of 2002 and the acquisition by Citigroup of Golden State Bancorp (a thrift institution with assets of $\$ 55$ billion) in the fourth quarter of 2002.
17. Changes over time in the total assets of the time-varying panel of fifty large bank holding companies are attributable to (1) changes in the companies that make up the panel and (2) to a small extent, restatements of financial reports between periods.
