# Report on the Condition of the U.S. Banking Industry: Fourth Quarter, 2003 

The assets of reporting bank holding companies expanded roughly $\$ 130$ billion, or 1.6 percent, in the fourth quarter. Securities and money market assets accounted for most of the increase, rising about $\$ 120$ billion after having declined in the third quarter. Bank holding companies added to their holdings of mortgage pass-through securities and direct obligations of U.S. government agencies. Loans grew 1.4 percent, a more modest pace than in recent periods, tempered by continuing declines in commercial and industrial lending and some shrinkage in the stock of residential mortgage loans held for sale to securitization vehicles (related to slower mortgage originations). Deposits and borrowings increased 2.3 percent and 2.4 percent, respectively, in part compensating for a decline in other liabilities.

Undrawn commitments to lend rose more than $\$ 200$ billion, or 5.4 percent, in the quarter and reached the $\$ 4.0$ trillion level for the first time. Most of the increase was in the credit card category, due in large part to the acquisition during the quarter of large credit card portfolios from non-bank-holding-company firms.

Asset quality showed further signs of improvement. Nonperforming assets continued to declineboth in absolute terms and as a share of loans-as they have since late 2002. The net charge-off ratio increased slightly in the fourth quarter, to 0.83 percent of average loans, but remained well below yearearlier levels.

Net income rose overall to $\$ 28.3$ billion for the fourth quarter, bringing full-year profits to $\$ 100$ billion for the first time. Net interest income accounted for much of the quarterly improvement and was fueled by healthy growth in securities holdings and a rebound in yields on mortgage-backed securitiesthe latter related to slower prepayments. Net interest margins inched up to 3.46 percent of period-average earning assets, representing at the least a pause in the steady contraction that margins have sustained since late 2001. Non-interest income recovered 4.5 percent after a small third-quarter decline, supported by higher fees from asset management, mortgage servicing, and investment banking. Non-interest expense, which often jumps in the final quarter of a year, increased only modestly in this case and continued to represent roughly 62 percent of pretax revenue.

All of the quarterly gain in aggregate earnings occurred at the "fifty large" bank holding companies. For "all other" bank holding companies, aggregate earnings declined slightly in the fourth quarter as they had in the third quarter. Non-interest costs at these smaller bank holding companies expanded nearly 6 percent in the fourth quarter, while noninterest income slipped slightly. The net charge-off ratio rose significantly at smaller institutions in the fourth quarter, although at 0.49 percent of average loans it was still only half the level of the "fifty large" bank holding companies.

Note. All data are as of the most recent period shown. The historical figures may not match those in earlier versions of this table because of mergers, significant acquisitions or divestitures, or revisions of bank holding company restatements to financial reports. Data for the most recent period may not include all late-filing institutions.

1. Covers top-tier bank holding companies except (1) those with consolidated assets of less than $\$ 150$ million and with only one subsidiary bank and (2) multibank holding companies with consolidated assets of less than $\$ 150$ million, with no debt outstanding to the general public and not engaged in certain nonbanking activities.
2. Data for all reporting bank holding companies and the fifty large bank holding companies reflect merger adjustments to the fifty large bank holding companies. Merger adjust-
ments account for mergers, acquisitions, other business combinations and large divestitures that occurred during the time period covered in the tables so that the historical information on each of the fifty underlying institutions depicts, to the greatest extent possible, the institutions as they exist in the most recent period. In general, adjustments for mergers among bank holding companies reflect the combination of historical data from predecessor bank holding companies.
The data for the fifty large bank holding companies have also been adjusted as necessary to match the historical figures in each company's most recently available financial statement.

In general, the data are not adjusted for changes in generally accepted accounting principles.
3. Includes minority interests in consolidated subsidiaries.
4. Includes credit card lines of credit as well as commercial lines of credit.
5. Includes loans sold to securitization vehicles in which bank holding companies retain some interest, whether through recourse or seller-provided credit enhancements or by servicing the underlying assets. Securitization data were first collected on the FR Y-9C report for June 2001
6. The notional value of a derivative is the reference amount of an asset on which an interest rate or price differential is calculated. The total notional value of a bank holding company's derivatives holdings is the sum of the notional values of each derivative contract regardless of whether the bank holding company is a payor or recipient of payments under the
contract. The actual cash flows and fair market values associated with these derivative contracts are generally only a small fraction of the contract's notional value
7 Ine are
bank holding companies exclude extraordinary items, the cumulative effects the fifty large bank holding companies exclude extraordinary items, the cumulative effects of changes in accounting principles, and discontinued operations at the fifty large institutions and therefore and expenses.
8. Calculated on a fully-taxable-equivalent basis
9. In general, the fifty large bank holding companies are the fifty largest bank holding companies as measured by total consolidated assets for the latest period shown. Excludes a few large bank holding companies whose commercial banking operations account for only a small portion of assets and earnings.
10. Excludes predecessor bank holding companies that were subsequently merged into other bank holding companies in the panel of fifty large bank holding companies. Also excludes those bank holding companies excluded from the panel of fifty large bank holding companies because commercial banking operations represent only a small part of their consolidated operations
11. Exclude qualifying institutions that are not reporting bank holding companies.
12. No data related to financial holding companies and only some data on nonbanking activities were collected on the FR Y-9C report before implementation of the Gramm-
13. A bank holding company is considered "foreign-owned" if it is majority-owned by a foreign entity. Data for foreign-owned companies do not include data for branches and agencies of foreign banks operating in the United States
14. Total assets of insured commercial banks in the United States as reported in the commercial bank Call Report (FFIEC 031 or 041, Reports of Condition and Income). Excludes separate call reports yet are also covered by the reports filed commercial banks the Also excludes data for mutual savings banks.
15. Data for thrift, foreign nonbank, and other nonbank institutions are total assets of each type of subsidiary as reported in the FR Y-9LP report. Data cover those subsidiaries in which the top-tier bank holding company directly or indirectly owns or controls more than 50 percent of the outstanding voting stock and that has been consolidated using generally accepted accounting principles. Data for securities broker-dealers are net assets (that is, total assets, excluding intercompany transactions) of broker-dealer subsidiaries engaged in activities pursuant to the Gramm-Leach-Bliley Act, as reported on schedule HC-M of the FR Y-9C report. Data for insurance activities are all insurance-related assets held by the bank holding company as reported on schedule HC-I of the FR Y-9C report.

Beginning in 2002:Q1, insurance totals exclude intercompany transactions and subsidiaries engaged in credit-related insurance or those engaged principally in insurance agency activities. Beginning in 2002:Q2, insurance totals include only newly authorized insurance activities under the Gramm-Leach-Bliley Act
16. Aggregate assets of thrift subsidiaries were affected significantly by the conversion of quarter of 2002 and the acquisition by Citigroup of Golden State Bancorp ( thrift instituquarter with asset $\$ 55$ billion) in the fouth quarter of 2002 tion with assets of $\$ 55$ billion) in the fourth quarter of 2002.
7. Changes over time in the total assets of the time-varying panel of fifty large bank holding companies are attributable to (1) changes in the companies that make up the panel and (2) to a small extent, restatements of financial reports between periods.
