**Subject:** Truth in Lending

Celia , Maria and Eric Sorensen of Granada Hills , California approve of your Boards proposed changes to Regulation Z. Indeed we are in favor of even more stringent controls over credit card companies abuses of their customers then are currently being proposed. This sector of the U. S. Economy is one important factor that effects the overall economic health of our country and our international trading partners. Please implement stricter regulations and enforcement in this area of our economy as an integral part of your management strategy to maintain Americas financial stability.
