Subject: Truth in Lending

Please don't just sit there and continue to watch Banks get away with legal thievery. I worked hard 40 years of my life and never got a 30% raise. I never got a 10% raise. What makes Banks think it's ok to take 30 plus % a month from anyone? This is absurd.

People also don't ask for most of these credit offers, as they are sent in the mail and online by the dozens everyday.

It's a pure bait and switch with the banks having no moral feeling for robbing the customer.

You need to give the banks and money loaning industry a new set of brains and some morals.

Please and thank you.
