Subject: Truth in Lending

What would be nice is a lower max on how much a creditor can charge interest.

It is a fact that some creditors will charge up to 32% in interest. Unfortunately, when I was 20 they stuck it to me hard 30.99%. It is 8 years later and I am still paying off a lot of the charges I made when I was 20 (and it was only a \$3000 balance!). It is ridiculous. Luckily I was able to consolidate last year.

Creditors should not be allowed to charge more than 10% interest to ANY borrower, great, good, bad, or ugly. Their greed is ruining our economy.

I am glad the Federal Government is finally putting legislation together to put an end to this highway robbery.

Thank you for giving me the opportunity to speak my mind.
