Subject: Regulation Z

This proposal will grossly add to the mortgage industry crisis.. further harming absolutely everyone! Not only will it make it even more difficult for citizens of the U.S. to buy a home, but will encourage foreign investors. Making our country yet less our country. Those of us licensed mortgage brokers that have stayed true to our industry are being pushed out by these ridiculous demands. Putting even more U.S. Citizens out of jobs. Much like foreign trade has put so many true Americans out of work. To then raise the prices of goods sold to citizens making less money????? How does that make sense?

This mortgage proposal is going to do more of the same. It has to be stopped.
