Subject: Regulation Z

To climate the stated loan would be ridiculous in nature. It would even damage the bearcats. I know the documentable income our congress men and women make. It is well publicized. I am sure that a majority of politicians don't want people going thru their financials. I will even go a step furthers by saying that 75% of all loans done by politicians were of the stated income. This law will damage them as much as us. It will cripple the market.
