Jul 24, 2008

Federal Reserve Board Email comments

Dear Email comments,

We have to stop the credit card companies from draing the consumers dry. They offer all this great deals and then you get roped in to more hidden charges and the interest rate takes all the money. THen you owe more interest than the payment. Then you can't pay either because you

take the credit card to help get out of debt and then your in more debt than you can pay because of the hidden charges. Then instead of paying the bills you have to file bankruptcy because you can't apy anything. This does not help the economy or the familes that are losing everything they have.

.

Sincerely,

Mrs. Cynthia Weatherspoon
