**Subject:** Regulation AA

Jul 24, 2008

Federal Reserve Board Email comments

Dear Email comments,

Like the financial system, rules and regulations help maintain a system that is both accessible and fair to all parties. The current Credit Card system is biased towards the Credit Card Companies favor. The current system is not accessible or fair towards the general public. Although several steps should be taken to equalize this current situation, this would be an initial step towards an equilibrium.

.

Sincerely,

Mr. Cass Thurston
