**Subject:** Regulation AA

Aug 21, 2008

Federal Reserve Board Email comments

Dear Email comments,

I urge you to consider supporting this important legislation.

The credit card companies have been abusing hard working Americans for far too long.

Raising interest rates on current balances, shortening due dates to trick customers into paying interest or late fees. These and other tactics are certainly distasteful (but they should be criminal).

Please support this bill and send a clear message to the credit card companies that their days of taking advantage of good, hard-working people are over.

Thank you!

Sincerely,

Mr. Edmund Medeiros
