Subject: Regulation AA

Jul 25, 2008

Federal Reserve Board Email comments

Dear Email comments,

Banks and other financial institutions that issue credit cards are taking unfair advantage of those least able to pay or those who have made some poor credit decisions. If these financial institutions are allowed to continue these practices, it's going to result in credit

problems similar to the current mortgage crisis. Please don't let that happen. Thank You for your consideration.

Sincerely,

Mr. Joe Easa
