Federal Reserve Board Email comments

Dear Email comments,

This is just a move to make us think the Fed is going to do something. Ha, when did they ever help the common person? They are too busy bailing out their friends in the credit/banking/broker industries. If you can think of a big business, the feds have bailed them out when their bonuses are at risk. I like the advice of Ronald Regan, "just say no". Stop paying the credit card bills until they role back to the original agreement you signed up for. Wake up! Nobody is going to bail you out! Take a stand and just say NO!

.

Sincerely,

Reverend Bob Roberts
