Subject: Regulation AA

They do whatever they can to get money out of their customers, like hold off smaller charges on debit card until bigger ones come in, so instead of paying 1 overdraft fee you end up with 6 or 7 or more. Or if you have a deposit and a withdrawl coming through at the the time, they put the withdrawl through first so if it over drafts your account they can charge you a fee even if the incoming deposit would have covered the withdrawl. They are slimy and all about getting money from their customers.

Sincerely,
Kristen Conway
