**Subject:** Regulation AA

I was just informed that I have 5 unauthorized overdrafts from my bank. I used the card thinking that it would not accept charges that were over my balance. I was under this impression because I applied for overdraft protection on this account and I was denied. The \$35 charge per unauthorized overdraft was as much as over 1000% higher than the charge. A \$3 charge at a parts store got a \$35 bank fee, and none of the charges were over 60% of the bank fee. One bank would do the payouts based on the highest amount first, regardless when it came into the bank. If there was a shortfall of fund this would cause the most overdraft fees.

This is at this time legal robbery by the banks.

This must stop!
