Federal Reserve Board Email comments

Dear Email comments,

Because I am very sick from a Drug that is funded by our government, (I was an intensive care nurse for 25 years) I lost my medical insurance and still cannot work. I had to put a lot of medical bills and gas on my card now to the tune of \$25,000. I think the cards should all have debt protection in the event of illness like mine instead of paying for it as in my case would have been an extra \$29 per month charged to my card with high interest. If one has excellent credit as I did before being made so terribly ill BY A DRUG FUNDED BY OUR COUNTRY THAT WAS ALSO CAUGHT IN FRAUDULENT MARKETING AND HAD TO PAY \$850 MILLION IN CRIMINAL FINES SO IT WOULD NOT LOSE ITS GOVT FUNDING, my credit was excellent and the protection service should be a free service to those with a certain credit score (thus encouraging work and nonessential spending) then I would be protected and it would have helped me not to lose everything I have. I am not proud of our government right now as they have NO common sense like this protection bill which would have been like having medical insurance for me. Now I have a huge amount of hospital, medical doctor bills and a credit card that I won't ever get paid off. If this protection had been in place for me (like I said I had excellent credit 750) maybe I would not be in a sinking ship. There is no way out. Terry Paulsen Lexington Ga ps what is my point? free protection plans on those of us with excellent credit and paying history. Thank you

Sincerely,

Miss Terry Paulsen
