Subject: Regulation AA

A Credit Card company has fully mishandled my given bills & scaring my given debt of \$51,032 in 09/2000 (instead of ~\$200), and for unfortunately not resolving that issue until my extensive pressure including the FBI was finally being included.

But even since that year - they are truly manipulating & screwing up my Credit Record (for now not allowing Insurance, other Cards or many other things years later), and with the Feds for not even caring --> when especially now including electricity for myself and almost DYING with their past problems. The Feds should immediately give better assistance for a public citizen.

Sincerely,

Shawn Delmar
