Subject: Regulation AA

Jun 11, 2008

Dear Email comments,

Please support the new rules for credit cards. It is important to do this, especially in today's declining economy when people are

struggling to make ends meet. Hiking interest rates should be outlawed, as well as interest charges on debts paid the previous month. My own brother has been a victim of these practices, and it has taken him years to catch up and get his life back on track.

.

Sincerely,

Ms. Joan Prefontaine
