Federal Reserve Board Email comments

Dear Email comments,

It is time our government leaders begin to once again protect the consumer in regard to the consumer credit card situation. The next industry to help the economy crash, is this industry who have pushed the consumer to take on more and more credit card debt knowing that most will reach a point that they can not pay them back. They have abused their powers and have taken advantage of even their best customers. We need representatives who are aiding the American public from unfair practices. It is your duty and responsibility to end the unfair practices currently used by the credit card company. Since they can not seem to do this without government intervention, laws need to be passed to control the abuses.

.

Sincerely,

Ms. Nancy Heaning
