**Comments:**

Well, Sir, maybe the price has a relation with the purchasing power parity, supply, and demand in the market. Perhaps, in the future most of the company, especially in manufacture will do on the job order than for the tailor made. Like in the car manufacture that should be limited edition and a few show case example in the showroom.

Thanks God, to the goverment that make the prosperity advancement for the citizen with the social security number; good attention goverment to the society.
