Federal Reserve Board Email comments

Dear Email comments,

my interest rate seems to change from month to month (i normally pay off the entire balance). Recently i chose to pay the interest for one month as a solution to a financial crunch. although i paid 1/3 of the bill (far above the "minimum" payment; the interest rate went

up 50% the next month. needless to say, i paid in full early. i would love to have a credit line i could trust.

Sincerely,

Ms. betty dusaint
