Subject: Regulation AA

Jul 29, 2008

Federal Reserve Board Email comments

Dear Email comments,

To Whom It May Concern:

As we struggle with this economy, credit card companies are exploiting every opportunity to jack up interest rates on credit cards for no reason whatsoever, and to charge outlandish fees, all which drive us deeper in debt. We just went through the mortgage mess because of abusive lending practices -- we don't need another credit crisis.

Please do something to stop the abuse of credit card companies ruining our USA

Sincerely,

Mrs. Catherine Green
