Federal Reserve Board Email comments

Dear Email comments,

I sincerely hope that you take action to reign in the greed that the credit card companies have taken to extreme excess. They have taken gross advantage of the American people, with their only motive being profit. Even though I have not fallen victim to most of these practices, I have seen ridiculous rises in interest rates and unfair

fees. It needs to stop. It's not good for America, as a whole. We also need to stop giving credit to those who can't pay, and turn our attention to educating consumers about living within their means. How much profit does a company need?

.

Sincerely,

Ms. Deborah Clark
