**Subject:** Regulation AA

How can the United States of America, supposedly, Government of the people, by the people, and for the people let Credit Card companies "steal" from and "screw" the people and not intervene? Everyone has to live, but, come on, interest rates 20-30%, increasing them whenever they want, charging fees for balances depending on the date of a statement--give US a break. People will never get out of debt. People bomb bard you to help you get out of debt for a fee. Put your foot down to help all the people not just the RICH! Sincerely, James Quigg; [oogie1952@msn.com](mailto:oogie1952@msn.com);
