Subject: Reg Z - Truth in Lending

---

Comments:

To Whom It May Concern:

During the current economic crisis, credit unions have been acknowledged as a bright spot in the financial industry. Yet in one fell swoop, our regulators and political leaders have managed to encumber those of us using Open-End Lending Plans with costly changes to a member oriented program that has worked efficiently for many years. This Act, as it refers to consumer open end lending plans, is neither efficient nor in the best interest of our members. At the very least, please extend the compliance deadline to allow time to comply with this onerous regulation.
