Comments:

I hope we can change the thought process on many of the economic factors we are facing as a country. We need to encourage more free enterprise with moderate regulation on it and if we are passing all of these laws to help the consumer. Let us then educate the consumer and not put road blocks in professionals lives. put programs in place to educate the consumer and not clog the political media with less needed information. I feel YSP to be regulated stricter reduces the free market and opportunities for many people. It stifles a well balanced machine.
