Comments:

Come on so requiring more lead time on how the credit card companies are going to impose interest rates that would be considered usury in any other industry! I am a lender and I am appalled at the allowable interest rates on credit cards! Please regulate an industry that is way out of control. Years ago I watched a Senate committee on credit card reform and what was the ridiculous solution was to move up minimum pays! Come on ignore the credit card lobbies and do what is right for the American public who is drowning in credit card 21-32% interest rates! Please do not discard these comments but actually forward to the decision makers!
