Comments:

They dam well better reinvest in our communities. We bailed there miss managed butt out of a catastrophic financial blunder. There heads should be on a platter, cause next time there is not going to be any bail out. You tell us to save our money then you do not give us anything for it. Were what keep you solvent, even if you want to down play our part. Some of us know how to manage our money far better than you over paid horses butt. So shape up and get with the program or I'll run for office and you will all be out of a job.
