Comments:

Social Capital and Socialized Capitalism will allow investment in the community; therefore, I, Thomas Gann Miller, think that the United States Economic System should be changed to a Banking System that employs Socialized Capitalism in competition with Privatized Capitalism; the U.S. Economy should be converted for economic competition of Social Capital and Socialized Capitalism with Private Capital and Privatized Capitalism and, if Private Capital and Privatized Capitalism cannot compete without an umbilical cord of Social Welfare to cyclically recapitalize Private Capital at public expense, that Privatized Capitalism should be allowed to die a natural death and be replaced by Social Capital and Socialized Capitalism; this subject is being discussed on many threads of the Truthdig.com Forum currently on "Troy Jollimore on Markets and Morality", other Truthdig threads are: "Financial Meltdown 101", "Hi Ho American Capitalism", "Pitfalls of Soaking the Rich", "This Country Needs a Few Good Communists", "Fiddling While The Economy Burns", "Chris Hedges and Derrick Jensen on Totalitarianism and Resistance", "David Sirota's Are Low Taxes Exacerbating the Recession" and "If only Information Flowed as Freely as Oil" to name a few and all on Truthdig.com.
