Comments:

Banks, investment companies, credit unions need to follow the rules as put forth by Congressional leaders and over-sight committees. Due to the reckless actions of a few (or it may have widespread) this country is now on the brink of financial collapse. This will have an impact of some sort world-wide. Also, the economy of the U.S. is in ruins thanks to your greed; this has a very deep/hard impact especially on what was the middle class. Get your acts together!
