Subject: Regulation Z - Truth in Lending

Comments:

To whom it may concern,

I own a small business and I whole heartedly support the regulation of credit card swipe fees. The fact that they have had to cap fees at .2% in Europe (due to anti trust investigations) but we here in USA have to pay .95% PLUS 20c per transaction is an absolute disgrace! DO SOMETHING!! Please make sure the plans to cap fees are not just closing the barn door after the horse has left the barn: no business in this country should be paying higher fees than a business in another country that happens to have a government with more guts to challenge corporate power than our own.

Thankyou
