Subject: Complaint Over Incompetence

I would like to file a complaint regarding the latest Dodd (Dud) Frank April Fool's joke on real estate appraisers. After being screwed out of all of their previous clients and 50% of their fees by lenders over the past two years they were assured by Congress that AMCs would be forced to pay them a FAIR FEE once again.

I spent 18 years building an appraisal firm from scratch but closed it without hesitation after watching 2 decades of clients be wiped away by Andrew Cuomo. It was that or live off of \$300 per month. I chose to live on \$0 per month and live off the land. I had no desire to work my butt off and hand all of the profit to banks through their AMCs.

I found a new calling in life this month thanks to government incompetence and bank greed....setting up a national boycott for appraisers. Perhaps you haven't noticed but appraisers have finally had enough of being screwed over. I've been taking calls and emails from across the country for two weeks from appraisers who are ready to participate.

If you can't fix the problem let us know because we can. Our goal is to shut down the mortgage market until the national media covers this nice story of greed, extortion, and misery.

Ken Harney's article of today was right on the money.
