I own a farm and feed supply store in a small town in Washington. I would like to see the interchange fees reduced across the board. My merchant fees average \$1,500 a month which is 2.1% of all credit/debit sales. This is equivalent to hiring another employee! If the government truly wants to provide an impetus to benefit small business and drive the economy, reducing fees would have a dramatic effect on the small businesses in America. Please stand behind your small businesses, the true foundation of the American Economy!

Best Regards,

Wendy Reddick, Owner
