Comments:

I am highly opposed to the Dodd-Frank Wall Street Reform and Consumer Protection Act. What are our legislators thinking? Government is becoming increasingly intrusive on all levels of private citizen's lives and small businesses. So many politicians do not read, some or all the proposals they sign in their entirety, nor do they necessarily understand the ramifications of the the bills they sign once they go into affect. How do we know they understand 100% of this bill they want passed and will literally affect millions of lives? I would like to see a check-off list of everyone who is prepared to sign on the dotted line, they have read it and completely understand it. We do not need to be ruled by a house that doesn't think it is important enough to read laws they want pushed through. Washington has become a loaded gun aimed at society, holding us all hostage to tax increases, layoffs and now, this latest proposal. Republicans want to take away medicare, and Michelle Obama has 22 aides, (versus the three, all other first ladies required). Maybe if we weren't supporting excessive white house staff, and other foreign countries, we would have the money to support our own people. If the federal government and the states would make the large corporations pay taxes, the burden wouldn't all fall predominantly on the middle class. If the government didn't allow so many jobs to be sent overseas, and the import of so many products, maybe America would not be suffer from such high unemployment. Enough is enough. Citizens need to use their voice - and do it now! Complaining to your neighbor will not do a thing. Washington is responsible for the mess we are in. The legislators did not monitor the banks and overlooked their illegal, acts, then rewarded them with taxpayer monies. To add insult to injury, these same instituions have cut lending back 90% and care little about rebuilding American's trust, or for that matter, our country. Now they want this bill pushed through. Thomas Jefferson was against government involvement on the level Obama is pushing to control us. Congress can't even balance a budget. If the average person kept their financials in the state our politician's mishandle taxpayer money, they would go to jail. Thomas Jefferson also believed we have a right to become incensed about payng for and being taxed for programs we do not believe in. Has Congress forgotten its history? Have our leaders forgotten why America was established? I suggest we remind them, and tell them "NO" to the Dodd-Frank Wall Street Reform and Consumer Protection Act. Adding "Consumer Protection" at the end of the title should be a clue that we are, and will not be protected from anyone. Again, this is simply a way for banks to gain more control of American's mortgages. I ask you to

please not sign or pass this proposal.
