Subject: Appraisers launch effort to shut down mortgage markets

Google: National Appraisers Boycott

Yep..we're shutting this G. D. mortgage market down boys. Hopefully the military has 50,000 to 60,000 appraisers to pick up the slack because it's going to be a long one.

You guys have had long enough to fix the loophole you conveniently installed to continue screwing appraisers out of their fees and their livelihoods. Try taking a 50% paycut and doing twice the amount of work you typically do for two years and you'll have a tiny clue as to what appraisers have endured during the HVCC bank rape process. Not to mention they were forced to surrender client lists that they spent decades building up.

Enjoy the ride!
